

School Readiness Starts With Personalized Learning

Our dedication to early education takes your employees' child care benefit to the next level, ensuring kindergarten readiness and setting their children on the path to future success.

At LCG schools, our innovative educational approach strengthens and develops what makes each child exceptional. **Here's how it works:**

TEACHERS

Observe and assess each child to provide customized experiences

CHILDREN

Engage with experiences and activities that meet them where they're at

FAMILIES

Stay involved through regular communication and classroom updates

Plus, our **proprietary digital observation, assessment, and lesson planning tool, Learning Care System™ (LCS)** enables teachers to generate **customized curriculum** for each child. LCS features:

More than **10,000 unique activities**

Activities that are geared toward what children are ready to learn

Tracking of each child's development for teachers to share with families

Wherever a child is in their learning journey, we're there every step of the way. We support children from 6 weeks to 5 years as they prepare to enter elementary school, while offering additional resources in the mornings and afternoons for school-age students (up to age 12).

We're proud to provide quality early education—and peace of mind—to working families.
